## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Askew.

Askew disclose a circuit board (10), having polymer sheet (20), potting material (22, 28), but does not disclose the polymer sheet made of polytetrafluoroethylene and the polymer sheet has a thickness of 0.015-0.03 in

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use polytetrafluoroethylene for the polymer sheet of Askew, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to select a specific thickness of the polymer film of Askew, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

***Allowable Subject Matter***

Claims 4-20 are allowed

***Response to Arguments***

Applicant's arguments filed 01-10-05 have been fully considered but they are not persuasive.

Applicant argues (1) that the circuit board 10 on which the electronic component 12 is mounted is not encapsulated within a potting material, (2) that potting material does not adhere to the surface of the Teflon film.

With respect to (1), see Fig 3. With respect to (2), it is noted that the features upon which applicant relies (i.e., Teflon film) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
